The "big red ball" resulting from the "shotting" in the Byers New Process. The actual weight of the ball shown is about 2,000 lbs., but this may be increased as desired, there being practically no limit save the size of the ladle or thimble used. Under the hand puddling method the "ball" weighs approximately 200 lbs.

**BYERS PIPE**

**GENUINE WROUGHT IRON**

Genuine wrought iron pipe—formerly made only in small quantities by laborious hand-puddling—is now being produced on a quantity basis by the Byers New Process.

The new process has enabled Byers not only to produce pipe at a lower price, but also of a superior quality.

Greater uniformity of slag distribution, better welds, and freedom from slag pockets make this pipe worthy of consideration when placing your next order.

We carry a complete stock—reflecting in price the recent decline made by the manufacturer. We can furnish random lengths or cut to length and threaded ready for installation.

“HOLYOKE”
KEROSENE WATER HEATER

How many people know they can have hot water conveniences for about 1 cent an hour? They know and enjoy the comforts of hot water during the winter while the furnace is going. They will not deprive themselves of these privileges during the summer months if you will explain the Holyoke to them.

SAN-EQUIP
SEPTIC TANKS

It will soon be open season on suburban work. Many people will not go thru another winter without the comforts and advantages offered by safe sewer disposal. The San Equip Septic Tank is moderately priced, light, compact and easy to install. People in suburban territory need to be told of the conveniences to be had thru the installation of this inexpensive Septic Tank. They should be told “now,” while the winter’s “discomforts” and “inconveniences,” are still fresh in their minds. Tell ’em.

R. W. Stewart of Alvo, decided he should attend the Well Drillers Convention. He went to his garage to get the family motorized phaeton, and discovered that the recent storm had drifted several inches of snow in front of the garage doors. After working unsuccessfully for about two hours to free the doors from the ice grips, he desperately sawed three inches off the bottom of the doors and made the convention on time. That is what we call real enthusiasm.

W. J. Ludwig is busy making himself known on his territory in central northern Nebraska.

J. H. Grovert of Indianola, to forestall any gun-play threatened by Guy “Preach” Roberts, made himself known at the office recently.

Gert: Did you get your husband a surprise on his birthday?
Sadie: I’ll say I did. You never saw a more surprised man in your life.
Gert: What did you get for him?
Sadie: Breakfast.—Life.

Grocer: “It’s no use suing you. Here is a receipt for what you owe. We’ll call it paid.”
Deadbeat: “Fine.”
Grocer: “Well, what are you waiting on?”
Deadbeat: “Isn’t it or-or-customary to give a fellow a cigar when he settles his account?”
